

Multi-Sector Integrated ERP System – SEUM IT Solutions

Overview

The ERP (Enterprise Resource Planning) system is a comprehensive, interconnected platform designed to serve multiple sectors:

1. Pilgrims and Umrah Transportation (by bus).
2. Hotel Management.
3. Travel Agencies & Tour Operators.
4. Hajj and Umrah Companies.

System Objectives:

- Centralize accounting, operational, and administrative processes.
- Automate routine tasks.
- Provide accurate real-time reporting.
- Integrate seamlessly with WhatsApp and Saudi government platforms.
- Customize functionalities per sector needs.
- Allow Seumer to sell and scale the system to clients by specialization.

User Structure

User Type Permissions

-  Super Admin (seum) Full control over clients, modules, subscription plans, and performance overview
-  Company / Organization Admin Full control over their company – manage staff, operations, and reports
-  Staff Role-based access (e.g. Agent, Driver, Admin, Supervisor, Accountant)

Core Modules in the System

1. Accounting & Finance:

- Journal entries and general ledger.
- Customer & supplier accounts.
- Payroll and expense management.
- Bank integration (transfers, account statements).
- ZATCA-compliant e-invoicing.
- Financial reports: balance sheet, income statement, cash flow.

2. Fleet Management & Vehicle Tracking:

- Vehicle registration and documentation (registration, insurance, maintenance).
- Live GPS tracking.
- Incident and violation logging.
- Driver-to-vehicle assignment.
- Reports: performance, costs, maintenance tracking.

3. Booking Management:

- Booking management for hotels, transport, tours, programs.
- Link bookings with other services.
- Auto-generated invoices after confirmation.
- WhatsApp notifications to clients.
- Reports: occupancy, confirmed/cancelled bookings, revenue tracking.

4. Daily Operations & Workflow:

- Job orders (trips, campaigns, group transport).
- Scheduling of drivers, vehicles, supervisors.
- Execution tracking and delay management.
- Reports for operational performance and KPIs.

5. 🏨 Hotel Management (for hotel clients):
- Room inventory (type, count, availability).
 - Cleaning and maintenance scheduling.
 - Hotel occupancy tracking.
 - Guest check-in/check-out and reservations.
 - Reports: occupancy rates, revenue, guest feedback.

6. 🕌 Hajj & Umrah Company Management:
- Umrah and Hajj campaign organization.
 - Pilgrim registration and visa processing.
 - Transportation and accommodation scheduling.
 - Full pilgrim lifecycle tracking (from visa to exit).
 - Reports: visas, campaign progress, exception handling.

🌐 Add-on: Domain & Website for Each Client

When a client (company/institution) is registered, they receive:

- A dedicated or subdomain: clientname.seuserp.com or almadina-tours.com.
- An auto-generated website displaying:
 - Company profile.
 - Services (Hotels – Transport – Umrah packages).
 - Booking portal.
 - Contact form integrated with WhatsApp.
- Official business email setup such as: info@clientdomain.com.

🤖 AI Integration in the System

1. Customer Service Chatbot:
 - Real-time conversations via the website or WhatsApp.
 - Auto-responses to frequently asked questions.
 - Booking or service status lookup.
2. Analytics & Reports Assistant:
 - Customer behavior analysis.
 - Predictive alerts (e.g., expected trip delays).
 - Suggestions for marketing or operational improvements.
3. OCR & Data Extraction:
 - Read invoices and document images.
 - Convert scanned data into structured system entries.
4. Smart Scheduling:
 - AI-based trip distribution based on resource availability.
 - Optimize asset utilization and reduce overlap.

📱 Integrations & Connectivity

Feature Description

- 💬 WhatsApp Real-time alerts: invoices, confirmations, status updates
- 🏛️ Government Platforms Integration with: Transport Authority, Ministry of Hajj, ZATCA, Absher, Balady
- 🔌 API Ready To connect with external platforms (e.g., hotel portals, reservation engines)

🔧 Recommended Technologies

Component Technology

Frontend React or Vue.js
Backend Laravel (PHP) or Node.js
Database MySQL / PostgreSQL
Mobile Apps Flutter / React Native
AI Capabilities OpenAI API – Python ML – GPT
Domain & Email Hosting WHM / cPanel – Zoho Mail – Google Workspace

📊 Main Dashboard Features

- KPIs per sector.
- Live operational reports.
- Alerts for overdue tasks.
- Branch-to-branch or company performance comparison.
- Exportable reports (PDF / Excel / Graphical).
